DGSM/SM505 - Mr P W Chandler

SEA BED STORAGE - FEASIBILITY STUDY

Reference:- Draft Feasibility Study; D/SSC/SM505/867/7/22, February 1989

Thankyou for the reference; Subs 11 comments are as follows:-

1. Under 'General' Paragraph:

- a) Prefer 'lowered' to 'sunk'.
- b) Prefer 'NIREX Waste Centre' to 'NIREX facility'.

2. Under 'Preparation of Reactor Plant' Paragraph:

- a) Prefer '...there is, foreseeable, no viable method...'.
- b) Where will the RC relief valve take its supply? Maybe as with Sea Disposal, a fresh water reservoir should be used.

3. Under 'Security' Paragraph:

- a) Last sentence: If the RC is not to be concrete-filled what additional security measures could be taken for the RC?

4. General: In some section a prediction of the damage to the submarine due to corrosion should be included (after 20 years and after 100 years).
